

March 5, 2010

John T. Gray
Senior Vice President - Policy & Economics

The Honorable Anne K. Quinlan Acting Secretary Surface Transportation Board 395 E Street, SW. Washington, DC 20423-0001 ENTERED
Office of Proceedings
MAR 5 2010
Part of
Public Record

Dear Ms. Quinlan:

This submission is the AAR forecast of the second quarter 2010 All-Inclusive Index and Rail Cost Adjustment Factor, filed in Ex Parte No. 290 (Sub-No. 5) (2010-2) *Quarterly Rail Adjustment Factor*. The versions of RCAF-related indices covered in this filing are: the All-Inclusive Index (initiated in the second quarter of 1985), the Unadjusted RCAF (produced since October 1982), the Adjusted RCAF (first published in the second quarter of 1989), and the RCAF-5 (created by the STB in its Ex Parte No. 290 (Sub-No. 7) decision served October 3, 1996). The table below summarizes the second quarter 2010 results on the fourth quarter 2007 base, and shows the percentage changes from the previous quarter.

	<u>2010Q1</u>	<u>2010Q2</u>	% Change
All-Inclusive Index	104.5	104.4	-0.1
Preliminary RCAF	1.045	1.044	-0.1
Forecast Error Adjustment	-0.007	0.016	
RCAF (Unadjusted)	1.038	1.060	2.1
Productivity Adjustment Factor	2.2204	2.2286 *	
RCAF (Adjusted)	0.467	0.476 *	1.9
PAF-5	2.3415	2.3502	
RCAF-5	0.443	0.451	1.8

^{*} Could be revised if the STB releases a productivity adjustment figure based on 2004 through 2008 data. Original decision's effective date was postponed. See page 5 of report.

Page 2 March 5, 2010

In its October 3, 1996 decision in Ex Parte No. 290 (Sub-No. 7), *Productivity Adjustment - Implementation*, the STB noted its intent to publish, in addition to the RCAF (Unadjusted) and RCAF (Adjusted), an RCAF-5 (i.e., a calculation of the productivity adjusted RCAF values as if the agency had always used a 5-year rolling average to calculate the productivity adjustment). In response to a request by STB staff, the AAR is including a calculation of the RCAF-5 in its quarterly RCAF filing. The AAR and its members, however, do not believe the publication of a third RCAF index is required or permitted by the applicable statute (49 U.S.C. § 10708) and do not endorse its publication.

Two copies of the quarterly non-proprietary workpapers underlying this submission are filed herewith, in accordance with the ICC's order in Ex Parte No. 290 (Sub-No. 2), *Railroad Cost Recovery Procedures*, served February 8, 1990. A third copy of the working papers has been delivered to Paul Aguiar in the STB office handling this proceeding. All workpapers are available for STB inspection. Questions should be directed to me or Clyde Crimmel (202 639-2309) of this office.

Sincerely,

John T. Grav

Introduction

On January 2, 1985, the Interstate Commerce Commission (ICC) [now the Surface Transportation Board (STB)] adopted the All-Inclusive Index of Railroad Costs as the basis for the Rail Cost Adjustment Factor (RCAF). The quarterly projection of railroad costs, as documented herein, employs the All-Inclusive Index as required by the regulations. Also presented in this submission is the RCAF, both Adjusted and Unadjusted, as required by the ICC in its decision in Ex Parte No. 290 (Sub-No. 4), Rail Cost Recovery Procedures - Productivity Adjustment, served March 24, 1989. In addition, the AAR has included (but does not endorse) the RCAF-5, which was instituted by an STB decision served October 3, 1996 in Ex Parte No. 290 (Sub-No. 7), Productivity Adjustment - Implementation. This quarter's projection of railroad costs is for the second quarter 2010.

Index Weights

In the Ex Parte No. 290 (Sub-No. 2) final rules, issued in April 1981, the Interstate Commerce Commission mandated that the weights of each major cost component be updated annually. These "external" weights are calculated using data from Schedules 410 and 210 of the R-1 annual report filed with the Surface Transportation Board by the Class I railroads. The weights are typically updated with the fourth quarter projection.

The 2008 (current) and 2007 (previous) weights are shown below. The previous (2007) weights were used for the fourth quarter of 2008 through the third quarter of 2009. Beginning with the fourth quarter of 2009, the 2008 weights are used. Comparing 2008 to 2007, the weight for Fuel continued to go up as expected, increasing from 20.3 to 25.2 percent. Although fuel prices were falling at the end of 2008, they were up significantly for the first half of the year, and achieved record highs. The weight for Labor decreased 2.6 percentage points, even though Labor expenses increased in 2008, because the increase in Labor expenses was dwarfed by the huge increase in Fuel expenses. All other changes in weights were by less than 1 percentage point.

RCAF Weights				
	Previous 2007	Current 2008		
Labor	32.8 %	30.2 %		
Fuel	20.3	25.2		
Materials & Supplies	5.0	5.1		
Equipment Rents	7.2	6.3		
Depreciation	11.0	10.4		
Interest	2.7	2.3		
Other	21.0	20.5		

Reweighting of the index is accomplished by calculating both the current quarter (normally the fourth) and prior (normally the third) quarter indexes with the new weights. The relative change between the two quarters is then multiplied times the prior quarter (usually the third) *linked* index. Use of this method ensures that the weight change, by itself, does not cause a change in the level of the All-Inclusive Index.

Internal weights in the labor and equipment rents components are updated at the same time as the external weights. When these weights are changed, they are also linked using the procedure described above in order to eliminate the effect of the change in weighting.

All-Inclusive Index Second Quarter 2010

The components and values of the current and previous All-Inclusive Indexes are shown below. Details of the construction of each component of the index are contained in the Appendices.

		Forecast			
	2008	Previous	Current	Percent	
	Weights	2010Q1	2010Q2	Change	
1. Labor	30.2%	356.9	357.3	0.1 %	
2. Fuel	25.2%	262.6	255.2	-2.8	
3. M&S	5.1%	242.7	240.2	-1.0	
4. Equipment Rents	6.3%	198.7	201.6	1.5	
5. Depreciation	10.4%	203.3	204.3	0.5	
6. Interest	2.3%	83.9	83.9	0.0	
7. Other	20.5%	199.8	207.3	3.8	
8. Weighted Average					
a. 1980 = 100		262.9	262.8		
b. 1980 = 100 (linked)		256.9	256.8 ¹		
c. 4Q07 = 100		104.5	104.4 ²	-0.1	

Index80 = (Current Index / Previous Index) * the Previous Quarter Linked Index

= 256.8

Index4Q07 = (Current Linked Index / 4Q07 Linking Factor) * 100

Indexes based on other periods: 4Q02 based index = 256.8 / 192.1 x 100 = 133.7

4Q97 based index = 256.8 / 173.2 x 100 = 148.3 4Q92 based index = 256.8 / 156.9 x 100 = 163.7 4Q87 based index = 256.8 / 132.2 x 100 = 194.3

¹ To calculate the 1980 = 100 Linked Index:

² To calculate the 4Q07 = 100 index:

Fourth Quarter 2009

Because of data availability, the forecast error adjustment has a two-quarter lag from each filing. As shown below, the fourth quarter actual index of 101.4 is 1.6 index points above the forecast value of 99.8. Therefore, the forecast error adjustment for second quarter 2010 is 1.6 index points.

	2008	Fourth Quarter 2009		Amt
	Weights	Forecast	Actual	Difference
1. Labor	30.2%	344.8	344.8	
2. Fuel	25.2%	234.4	244.0	
3. M&S	5.1%	238.8	238.8	
4. Equipment Rents ¹	6.3%	197.9	198.8	
5. Depreciation	10.4%	198.9	203.5	
6. Interest	2.3%	83.9	83.9	
7. Other	20.5%	198.7	199.9	
8. Weighted Average				
a. 1980 = 100		251.2	254.4	
b. 1980 = 100 (linked)		245.5	249.4 ²	
c. $4Q07 = 100^3$		99.8	101.4	1.6
_				

Forecast error — 1.6 index points

Note: The standard linking procedure has been used to eliminate any changes to indexes that would be caused by updating weights. The Q3 unlinked weighted averages for the All-Inclusive Indexes (forecast and actual) and for Equipment Rents (forecast and actual) were recalculated using the new (2008) weights.

1	2008	Fourth Quarter 2009	
	Weights	Forecast	Actual
Car-Hire	43.9%	185.5	185.5
Lease Rentals	56.1%	198.7	199.9
Weighted Average		192.9	193.6
Weighted Average (lir	nked)	197.9	198.8

² Linked actual index = (actual index / previous actual index) x previous linked actual index. 249.4 = 254.4 / 248.7 x 243.8

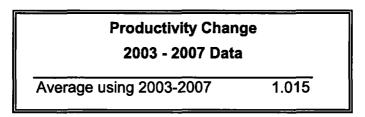

³ The 4Q07 based indexes are 1980 based indexes divided by the 4Q07 linking factor (245.9/100). Other linking factors are: 4Q02 = 192.1; 4Q97 = 173.2; 4Q92 = 156.9; and 4Q87 = 132.2.

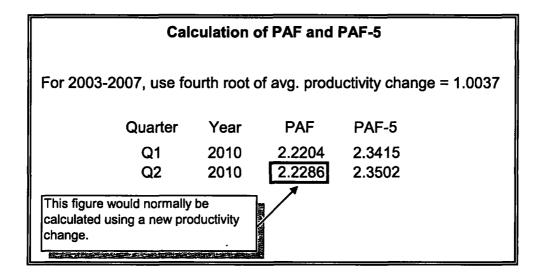

Productivity

On February 1, 2010, the Surface Transportation Board (STB) served a decision in Ex Parte 290 (Sub-No. 4) which modified its earlier decision that added the year 2008 to the Productivity Adjustment Factor (PAF) and deleted the year 2003. The decision created a geometric average annual productivity change for 2004 through 2008 of 1.0 percent per year, effective March 1.

However, on February 26, 2010, the STB postponed the effective date of their 2004-2008 productivity adjustment change. Therefore, the AAR has continued using the productivity adjustment change that is still in effect, which is based on 2003-2007. This creates the probability that the AAR will have to submit a modification to the 2010-Q2 RCAF calculation. Since only the Productivity Adjustment Factor and RCAF-A are affected, three pages of the filing could change: the cover letter, page 5 and page 6. The "PAF-5" is not affected.

The input and output indexes necessary to calculate the average annual productivity change based on 2003 through 2007 are listed in the previous quarter's filing (December 4, 2009). The geometric average for that period is 1.5 percent, and it is listed below in ratio format – meaning 1.5 percent is 1.015. The quarterly productivity adjustment factors (PAF) are calculated by increasing the previous quarter's PAF by quarterly versions of the annual rate which are the fourth root of the average annual growth rate, which is also listed below in ratio format. The difference between the PAF and the PAF-5 is the timing of the 5-year productivity trend.

Rail Cost Adjustment Factor Second Quarter 2010

Four RCAF values are presented in this filing. Two are not modified for productivity (Preliminary RCAF and RCAF Unadjusted), and two incorporate a productivity calculation (RCAF Adjusted and RCAF-5). The All-Inclusive Index and all four RCAF values, plus the percent change for each, are shown below. Note that the All-Inclusive Index is on a 2007O4=100 basis.

	Previous 2010Q1	Current 2010Q2	Percent Change
All-Inclusive Index ¹	104.5	104.4	-0.1
Preliminary RCAF ²	1.045	1.044	-0.1
Forecast Error Adjustment ³	-0.007	0.016	
RCAF (Unadjusted) ⁴	1.038	1.060	2.1
Productivity Adjustment Factor ⁵	2.2204	2.2286 *	
RCAF (Adjusted) ⁶	0.467	0.476 *	1.9
PAF-5 ⁷	2.3415	2.3502	
RCAF-5 ⁸	0.443	0.451	1.8

¹ See All-Inclusive Index on page 3.

² All-Inclusive Index divided by the All-Inclusive Index in the base period (100.0).

³ The current figure is from Forecast vs. Actual All-Inclusive Index in this filing (page 4). The previous quarter figure is shown in a similar section of the previous quarter's filing.

⁴ Preliminary RCAF plus the forecast error adjustment.

⁵ See Productivity on page 5.

⁶ RCAF (Unadjusted) divided by the Productivity Adjustment Factor (PAF).

⁷ See Productivity on page 5.

⁸ RCAF (Unadjusted) divided by the PAF-5.

^{*} Could be revised if the STB releases a productivity adjustment figure based on 2004 through 2008 data. Original decision's effective date was postponed. See page 5.

Appendixes

Labor Second Quarter 2010

The second quarter 2010 Labor Index is forecast to increase 0.1 percent. All changes were reletively small. Two new labor agreements and one railroad's annual contribution to an employee stock plan were offset by lower bonuses.

Wage Rate Index

The Wage Rate Index portion of the Labor Index decreased 0.1 percent from the previous quarter. Although wage rates were 0.2 percent higher, the complete amortization and removal of certain lump sum amounts resulted in a small net decrease.

Wage Increases: There were no general wage increases scheduled for the second quarter in the national agreements. One railroad's independent union will receive a general wage increase effective April 1. January 2010 general wage increases from two recently received new independent labor agreements with the BLET were added to the index along with one quarter of back pay. [See Appendix H for common railroad and union abbreviations.]

Lump Sums: The lump sum rate dropped primarily because of the complete amortization and removal of two performance bonuses paid in 2009 for performance in 2008. The bonuses paid in 2010 for performance in 2009 were lower, causing the net drop.

Back Pay: The back pay rate increased by two cents because of the two new independent BLET labor agreements mentioned previously. Both new agreements had January 1, 2010, labor general wage increases that were added to the index in the second quarter because of the dates the agreements were received. Back pay was added to account for the one quarter difference.

Other: Other wages contains the amortization of profit sharing payments that the BNSF Railway makes each year to its dispatchers, yardmasters, and engineers. This rate is unchanged, and it is the final quarter amortization for a payment made in 2009 for profit in 2008.

Supplements Index

One railroad's annual contribution to an employee stock ownership program caused the 0.4 percent increase in the Supplements Index.

Health & Welfare: The Health & Welfare rate was unchanged from the first quarter. The two newly received independent labor agreements continued participation with the national Health & Welfare plan, so no changes were necessary in the rate.

Labor Second Quarter 2010

Railroad Retirement: The Railroad Retirement Rate was essentially unchanged, as it decreased by three tenths of a cent because of the slight decrease in the taxable wage rate.

Unemployment Insurance: The unemployment insurance hourly rate was unchanged

Other: The "Other" category is a reflection of all other fringe benefits, and currently contains known employer contributions to employee 401(k) accounts and employer contributions to employee stock plans that are recorded as fringe benefits. The increase was caused mostly by one railroad's annual contribution to an employee stock ownership plan.

Labor Index Calculation

As shown in Table A-1 on the next page, the 0.1 percent decrease in the Wage Index and the 0.4 percent increase in the Supplements Index had a combined effect of a 0.1 percent increase in the Labor Index. The linked second quarter 2010 index is 357.3.

Labor Second Quarter 2010

Table A-1 Labor Index

			Cha	nge
	2010Q1	2010Q2	Percent	Amount
Base Wage - Straight Time				
& Pay For Time Not Worked	\$35.534	\$35.599	0.2%	\$0.065
Adjustments:

³ 2008 weights: wages, supplements	72.3%	27.7%	

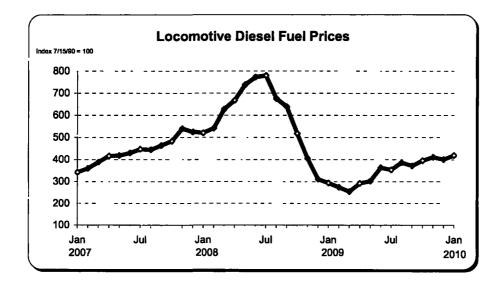

⁴ 2010Q2 linked Index = 2010Q1 linked x (2010Q2 / 2010Q1)

^{= 356.9} x 370.6 / 370.2

Fuel Second Quarter 2010

The forecast for fuel is based on: (1) a survey of railroad fuel purchasing officers concerning current price and volume levels, (2) expectations of railroad purchasing officers based on their own forecast models and discussions with their major suppliers, and (3) a consensus of petroleum industry experts and general business publications.

After huge price drops in the last half of 2008, locomotive diesel fuel prices began increasing in April 2009. Since June 2009, locomotive diesel fuel prices been trending upward at a *relatively* lower and stable rate. The June to January increase in prices averages to about 2 percent per month. January is the latest month available for locomotive diesel fuel prices, but weekly heating oil prices are available through March 1 from the U.S. Energy Information Administration.* Residential heating oil prices were up and down in February, but prices are below some of the highs achieved during January. Railroads believe locomotive diesel fuel prices will experience a small decrease when comparing the April 2010 (Q2) average price to January 2010 (Q1). The expected average price for the second quarter is 2.8 percent below the forecast for the first quarter.

Forecast Fuel Index 255.2
Change from previous quarter forecast -2.8%
Change from previous quarter actual -1.3%

^{*} Heating oil and locomotive diesel fuel are part of a group of closely related products, commonly labeled as distillates, that differ mostly by their sulfur content. Because of these similarities, these fuels are produced together and have similar pricing trends.

Materials & Supplies Second Quarter 2010

Lower prices for forest products, and for metal products, caused the second quarter 2010 Materials & Supplies Index to decrease 1.0 percent from the Materials & Supplies Index filed in the first quarter. The second quarter index is 3.5 percent below its value for one year ago (second quarter 2009).

2010Q2 Materials & Supplies Index = 240.2 2010Q1 Materials & Supplies Index = 242.7

Difference -2.5 basis points

or

-1.0 %

Equipment RentsSecond Quarter 2010

The Equipment Rents Index consists of two components – car hire and lease rentals. The methodology used to create these two components and the final Equipment Rents Index are explained below.

Car Hire

The car hire component is indexed using data from the Car Hire Accounting Rate Master (CHARM) file. Car hire rates for the forecast quarter are estimated based on data for the most recent month available. For the first quarter, December 1 of the previous year is used. For the second, third and fourth quarters; March 1, June 1, and September 1 are used, respectively. Using data retrieved from the latest CHARM file, an average rate per car is developed. Next, those average rates are grouped into car type categories to create an overall summary of car hire rates. The summary rates are then compared from quarter to quarter to determine the Car Hire Index.

Lease Rentals

The lease rentals portion of the Equipment Rents Index uses the Producer Price Index for Industrial Commodities less Fuel and Related Products and Power (PPI-LF). The Commission adopted this surrogate in its decision served March 13, 1987. The AAR uses six years of historical data to derive its forecast for the PPI-LF. The forecast is used not only for lease rentals, but also for the "Other" component of the All-Inclusive Index. Appendix G discusses the forecast in more detail.

Equipment Rent Index Calculation

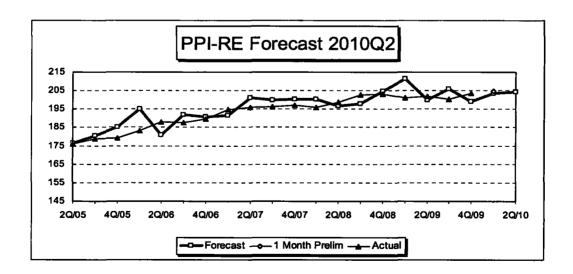

The table below calculates the Equipment Rent Index, which increased 1.5 percent. The Car Hire portion of the Index decreased 1.7 percent because of lower rates for privately-owned cars. A 3.8 percent increase for the PPI-LF (See Appendix G) used as a proxy for Lease Rentals, combined with the 1.7 percent decrease for Car Hire, caused the Equipment Rent Index to increase 1.5 percent.

Car Hire Lease Rentals Weighted Average	2008 Weight 43.9% 56.1%	2010Q1 185.8 199.8 193.7	2010Q2 182.7 207.3 196.5	Percent Change -1.7 % 3.8 1.4
Weighted Average	(Linked)	198.7	201.6	1.5

Depreciation Second Quarter 2010

The Producer Price Index for Railroad Equipment (PPI-RE) is used to index depreciation expense. The PPI-RE is forecast using an ARIMA (Auto-Regressive Integrated Moving Average) process where a statistical package picks the model that best fits the historical data set (see next page), and that model is then used for the forecast. The historical data set contains 6 years of monthly data (a sample size of 72), where the most recent available data point is the first month of the quarter prior to the forecast quarter. For a first quarter forecast, the most recent month of data available would be for October of the prior year. For a second quarter forecast, January would normally be the most recent period available. April and July would be the most recent months available for third and fourth quarter forecasts, respectively. The output from the forecast model is shown on page 2 of this appendix on a 1982=100 basis. The figure forecast by the model reflects monthly PPI-RE figures that have increased in four of the last five months.

Forecast of Depreciation Index (1982=100)	184.7
Forecast of Depreciation Index (1980=100)	204.3
Change from previous quarter forecast	0.5%
Change from actual first month of previous quarter	-0.1%
Change from same quarter of prior year (actual)	1.2%

Interest Second Quarter 2010

The Interstate Commerce Commission, in its decision served February 28, 1989, revised the All-Inclusive Index methodology to include a specific interest component, which is to track changes in the average interest rate from year to year. The interest rate is essentially the embedded cost of debt, i.e., total interest expense divided by average total long term debt. The interest rate is calculated for the most recent year and used until the next year's figures are available. Typically in the fourth quarter filing, the interest rate is updated to the new level. The source for interest expense is Schedule 210, column b, from the R-1 annual report. The lines used from current R-1 annual reports are listed below. The source for average total debt is Schedule 200 from the R-1 annual report. The sums of data from columns b and c (ending and beginning balances) are combined and divided by 2 to compute an average balance. The line numbers are listed below. Beginning with fourth quarter 2009, the Interest Index is based on data for 2008.

Interest Expense (Schedule 210)

Line

- 42 Total Fixed Charges
- 44 Contingent Interest

less

22 Release of Premium on Funded Debt

Average Total Debt (Schedule 200)

- 39 Equipment Obligations and Other Long Term Debt Due Within Onc Year
- 41 Funded Debt Unmatured Non-Current
- 42 Equipment Obligations Non-Current
- 43 Capitalized Lease Obligatons Non-Current
- 44 Debt in Default Non-Current
- 45 Accounts Payable: Affiliated Companies Non-Current
- 46 Unamortized Debt Premium Non-Current

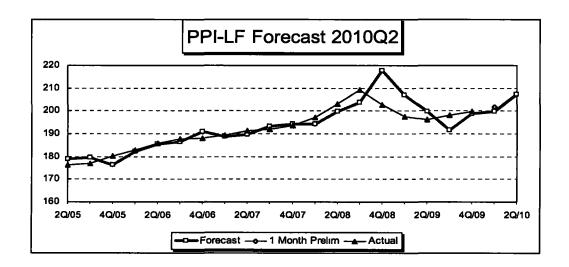

2008	Interest Rate	6.59%
1980	Interest Rate	7.85%
2010Q2	Interest Index	83.9
2010Q1	Interest Index	83.9
	Percent Change	0.0%

Other Expenses Second Quarter 2010

The Producer Price Index for Industrial Commodities less Fuels and Related Products and Power (PPI-LF) is used to index purchased services, casualties and insurance, loss and damage, taxes (other than income and payroll), general and administrative expenses, and lease rentals. These expenses, when grouped together, are usually called "Other" expenses.

Like the PPI-RE, the PPI-LF is forecast using an ARIMA process on 6 years of monthly data (a sample size of 72) with the most recent available monthly data being the first month of the quarter prior to the forecast quarter. For a first quarter forecast, the most recent month of data available would be for October of the prior year. For a second quarter forecast, January would normally be the most recent month available. April and July would be the most recent months available for third and fourth quarter forecasts respectively. The output from the forecast model is shown on page 2 of this appendix for 1982=100. The figure forecast by the model for the second quarter reflects monthly PPI-LF figures that have increased for eight consecutive months, with the highest percentage increase coming from the most recent (January) month. Despite the 3.8 percent increase in the quarterly Other Expenses Index, the 2010-Q2 forecast is still below the peak forecast.

Forecast of Other Expense Index (1982=100)	184.9
Forecast of Other Expense Index (1980=100)	207.3
Change from previous quarter forecast	3.8%
Change from actual first month of previous quarter	2.7%
Change from same quarter of prior year (actual)	5.7%

Other Expenses Second Quarter 2010

PPI INDUSTRIAL COMMODITIES LESS FUELS AND RELATED PRODUCTS AND POWER

SURFACE TRANSPORTATION BOARD

DECISION

STB Ex Parte No. 290 (Sub-No. 4)

RAILROAD COST RECOVERY PROCEDURES—PRODUCTIVITY ADJUSTMENT

Decided: February 26, 2010

By decision served on February 1, 2010, the Board proposed to adopt 1.010 (1.0% per year) as the measure of average change in railroad productivity for the 2004-2008 (5-year) averaging period. This value is a decline of 0.5% from the current measure of 1.5% that was developed for the 2003-2007 period.

The February 1, 2010 decision provided an opportunity to file comments regarding any perceived data and computational errors in the Board's calculation. The Board's decision also stated that the proposed productivity adjustment would become effective on March 1, 2010, unless a further order were issued postponing the effective date.

On February 22, 2010, the Board received timely comments from the Western Coal Traffic League (WCTL) regarding the output index calculation for 2008. To allow for adequate consideration of WCTL's comments, we will postpone the effective date of the 2004-2008 productivity adjustment pending further order of the Board.

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

It is ordered:

- 1. The effective date of the 2004-2008 productivity adjustment is postponed pending further order of the Board.
 - 2. This decision is effective on the date of service.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

Notes

- 1. CN Railroads includes B&LE, CC&P, DMIR, DW&P, GTW, IC, and WC
- 2. "Dispatcher 4" was benchmarked based on 2008 Wage Statistics as independent, even though the new national ATDA contract was signed September 1, 2007.

RCAF Taxable Wages

(To Use for Railroad Retirement and Unemployment Insurance Payroli Tax Calculations)

In the RCAF calculation, Total Wages are the wages paid, while Taxable Wages are the wages on which to base payroll tax calculations. The difference is caused by pre-tax employee contributions to help pay Health & Welfare costs. This page calculates that wage rate difference.

The national agreements feature employee Health & Welfare cost sharing. Some of the independent agreements adopt the dollar amount contributed under the national agreement, and some have their own employee contribution rate such as the CN Management H&W Plan. This Cost Sharing is a pre-tax employee contribution to Health & Welfare insurance premiums paid by the employer. The employee contribution reduces employer Health & Welfare costs, while the Health & Welfare insurance premiums paid to the provider are unchanged. In the RCAF calculation, the reduction to the employer's Health & Welfare costs affect the Supplements portion of the Labor component of the index. The Taxable Wage Rate is used for Railroad Retirement and Unemployment Insurance calculations.

Reduction Calculation for 2Q/2010

U.S. ST Hours = Wage Statistics are for 2008.

Note: The 2008 Average and 12/31/08 Straight Time Hourly Rates are the industry rates, and include all Class I railroad employees. The rates for 1/1/09 through 7/1/10 are based on the industry yearend rates updated by NATIONAL UNION wage increases using contract information. These national increases are diluted using "percent national" ratios to account for non-national union contracts. The impacts of non-national (or independent contract) increases after 2008 are not shown on this page and are handled separately.

Note: Average Annual Taxable Earnings is calculated from the RRB 1% sample data, by multiplying the average annual earnings in the file times the "Factor", and limiting the amount to the earnings base. Thus, the annual hourly earnings used for the calculation of the Factor is for the RRB sample year, and the Factor brings the earnings in the RRB 1% sample file to the current quarter's level.

RE:

Materials & Supplies Price Revision for

A railroad (named above) reported a price of \$ 1000000 for the current period 11/15/09 (4Q2009). This price was included in the M&S Index calculation for the 2010Q1 RCAF which was submitted to the STB on December 4, 2009. After the RCAF was filed, the railroad revised the item's price upward from \$

A test calculation, using the corrected price of \$ 1000, resulted in an M&S Index of 243.8 for the 2010Q1 Rail Cost Adjustment Factor — while 242.7 was originally filed. However, the RCAF's All-Inclusive Index, which uses the M&S Index as a component, rounds to the same number with either version of the M&S Index. Therefore, the revision has no effect on any version of the 2010Q1 RCAF. Calculations using both versions of the M&S Index are shown in the attached page.

To make certain that the original price (and the resulting too low M&S Index) does not affect future RCAF calculations (although the probability is low), it was decided that the corrected price should be used in all future calculations. A quick summary of the revision is listed below.

- The M&S Index used in the 2010Q1 RCAF filing was too low.
- A corrected M&S Index value has no effect on the 2010Q1 RCAF.
- The M&S Index calculation for the 2010Q2 RCAF treats the prior quarter as if the revised number was always in place. This ensures that the railroad's original price has no impact on the 2010Q2 RCAF or any future RCAFs. Therefore, the M&S work paper for the 2010Q2 RCAF will show 243.8 as the previous quarter index instead of the original number, 242.7.
- The Forecast Error Adjustment calculation to be used in the 2010Q3 RCAF, which will compare the Q1 forecast to a Q1 actual, will have a rare difference in the M&S Indexes. The forecast will use the as-filed 242.7, while the actual will use 243.8.

lf_ppi.txt

Forecast Pro Version 4.3 Standard Edition

Database I:\Indexes2\RCAF\2010q2\70ther\FPlf_ppi.xls is open and ready for use.

Expert data exploration of dependent variable PPILF

Length 72 Minimum 148.200 Maximum 186.600 Mean 167.835 Standard deviation 10.312

Classical decomposition (multiplicative) Trend-cycle: 97.03% Seasonal: 0.37% Irregular: 2.60%

Choice is narrowed down to Box-Jenkins or exponential smoothing.

Box-Jenkins outperforms exponential smoothing by 1.758 to 3.092 out-of-sample Mean Absolute Deviation. I tried 78 forecasts up to a maximum horizon 12.

Series is trended and seasonal.

Recommended model: Box-Jenkins Forecast Model for PPILF

ARIMA(0,2,0)

WC BLET

- i) Effective April 1, 2005, the rate of pay for Engineers will be \$29.08 per hour. This rate will apply to all time on duty, unless otherwise specified in the Agreement.
- ii) Effective April 1, 2006, the rate of pay for Engineers will be \$30.15 per hour. This rate will apply to all time on duty, unless otherwise specified in the Agreement.
- iii) Effective April 1, 2007, the rate of pay for Engineers will be \$31.23 per hour. This rate will apply to all time on duty, unless otherwise specified in the Agreement.
- iv) Effective April 1, 2008, the rate of pay for Engineers will be \$32.31 per hour. This rate will apply to all time on duty, unless otherwise specified in the Agreement.
- v) Effective April 1, 2009, the rate of pay for Engineers will be \$33.38 per hour. This rate will apply to all time on duty, unless otherwise specified in the Agreement.
- vi) Effective April 1, 2010, the rate of pay for Engineers will be \$34.46 per hour. This rate will apply to all time on duty, unless otherwise specified in the Agreement.
- B. Ten (10) hours or less will constitute a basic day and pay for all service performed after ten (10) hours will be at the rate of time and one half.
- C. Engineers who perform service on their assigned rest days shall be paid for such service at the rate of time and one half, subject to the provisions of Article 11 (A) of this Agreement.

34.46: 33,38= 3.23547

ARTICLE 6 - EMPLOYMENT SECURITY

- A. Engineers who have established seniority prior to ratification and who are in active service as an Engineer on the effective date of this Agreement, will be provided an assignment (which may be a Regular Assignment or a Guaranteed Extra Board assignment) established pursuant to Article 8 Section 1 of this Agreement, and not be subject to furlough, provided that they have exercised their seniority to the fullest extent and they remain available for service.
- B. In the case of Engineers who establish seniority subsequent to the effective date of this Agreement, when no vacancies exist on the Division, the Company will endeavor to provide the individual with details of any other openings that may exist on other U.S. Divisions. These opportunities may be in other occupations and may require the Engineer to transfer at his own expense and commence a new employment relationship with the new Division.
- C. All Engineers who qualify as an Engineer subsequent to the date of this Agreement will be afforded the Employment Security provided in Paragraph A of this Article upon their completion of sixty (60) months of cumulative compensated service as a Locomotive Engineer under this Agreement. Cumulative compensated service is defined as all time the employee is assigned to an Engineer position.

new- received 2/18/10

Memorandum of Agreement

between the

Brotherhood of Locomotive Engineers and Trainmen

and the

BNSF Railway Company

THIS AGREEMENT, made this 3rd day of November, 2009 by and between the Brotherhood of Locomotive Engineers and Trainmen (BLET) and the BNSF Railway Company (BNSF), modifies existing agreements between BLET and BNSF, including existing agreements from the former component roads, only to the extent described herein. It is hereby agreed:

Article 1 - Wages

Section 1 - First General Wage increase

- a) Effective January 1, 2010, all standard basic daily rates of pay for employees represented by the Brotherhood of Locomotive Engineers and Trainmen ("BLET") in effect on December 31, 2009, shall be increased by one (1) percent.
- b) In computing the increase under paragraph (a) above, one (1) percent shall be applied to the standard basic daily rates of pay applicable in the following weight-on-drivers brackets, and the amounts so produced shall be added to each standard basic daily rate of pay:

Passenger 600,000 and less than 650,000 pounds

Freight 950,000 and less than 1,000,000 pounds (through freight rates)

Yard Engineers Less than 500,000 pounds

Yard Firemen Less than 500,000 pounds (separate computation covering five-day

rates and other than five-day rates)

Section 2 - Second General Wage Increase

Effective January 1, 2011, all standard basic daily rates of pay in effect on December 31, 2010 for employees represented by the BLET shall be increased by two (2) percent, computed and applied in the same manner prescribed in Section 1(b) above.

Section 3 - Third General Wage Increase

Effective January 1, 2012, all standard basic daily rates of pay in effect on December 31, 2011 for employees represented by the BLET shall be increased by two-and-one-half (2 1/2) percent, computed and applied in the same manner prescribed in Section 1(b) above.

Section 4 - Fourth General Wage Increase

Effective January 1, 2013, all standard basic daily rates of pay in effect on December 31, 2012 for employees represented by the BLET shall be increased by two-and-one-half (2 1/2) percent, computed and applied in the same manner prescribed in Section 1(b) above.

MEMORANDUM OF AGREEMENT

Between

CSX TRANSPORTATION, INC.

And its employees represented by the

BROTHERHOOD OF LOCOMOTIVE ENGINEERS AND TRAINMEN (EASTERN LINES – WESTERN LINES - NORTHERN LINES)

It is hereby agreed that CSXT Labor Agreement No. 1-023-07 is modified only to the extent described herein:

I – RATES OF PAY

- A. Effective January 1, 2010, all standard rates of pay for Engineers subject to Agreements between CSXT and the Brotherhood of Locomotive Engineers and Trainmen (BLET) in effect on December 31, 2009, including extra board guarantees, shall increase by five percent (5%).
- B. In computing the increase under Paragraph A. above, the 5% shall be applied to the standard basic daily rates of pay applicable in the following weight-on-drivers brackets, and the amounts so produced shall be added to each standard basic rate of pay. The adjustments provided for in this Article will apply to mileage rates of pay for overmiles, and will not apply to duplicate time payments, including arbitraries and special allowances that are expressed in time, miles, or fixed amounts of money, except as otherwise provided.
 - Passenger 950,001 and less than 1,000,000 pounds
 - Freight 950,001 and less than 1,000,000 pounds (through freight rates)
 - Yard Engineers Less than 500,000 pounds
 - Yard Firemen Less than 500,000 pounds (separate computation covering five-day rates and other than five-day rates)
- C. Additional General Wage Increases will be effective on the following dates for Engineers subject to Agreements between CSXT and the Brotherhood of Locomotive Engineers and Trainmen (BLET) and will be computed and applied in the same manner prescribed in paragraph A. and B. above:
 - a) January 1, 2011 two and one half percent (2 1/2 %)
 - b) January 1, 2012 two and one half percent (2 1/2 %)
 - c) January 1, 2013 three percent (3%)
 - d) January 1, 2014 three percent (3%)
- D. Rates of pay will be posted by the Carrier electronically for access by the employees.

A-1: Yes.

ARTICLE 5 - PERFECT ATTENDANCE STOCK AWARD

- A. Effective with the date of this Agreement, all eligible CSXT Engineers will be entitled to an award of twenty (20) shares of CSX Corporation Common Stock for every six (6) months of perfect weekend attendance. The sixth month periods begin January 1 and July 1 each year.
- B. Perfect weekend attendance is defined as one hundred percent (100%) availability on Friday, Saturday and Sunday during a consecutive six (6) month period. Rest days are considered as being available for service. Any other non-compensated mark offs will be considered as unavailable. Recipients of this award will have such shares placed in their 401(k) account. Those awardees who do not have a 401(k) account will receive the cash equivalent of said stock based on the closing price of CSX stock on the last day of the semi-annual period.

ARTICLE 6 - PERFORMANCE BONUS PROGRAM

- A. The parties agree that Engineers represented by the Brotherhood of Locomotive Engineers and Trainmen (BLET) will be eligible for a bonus payment under the Performance Bonus Program (PBP) established in this Agreement for the periods and on the basis set forth below:
- 1. Effective January 1, 2007 and payable in 2008, locomotive Engineers will be eligible for a bonus up to a maximum of six percent (6%) of their locomotive Engineer earnings in 2007, calculated in accordance with paragraph B below.
- 2. Effective January 1, 2008 and payable in 2009, locomotive Engineers will be eligible for a bonus up to a maximum of eight percent (8%) of their locomotive Engineer earnings in 2008, calculated in accordance with paragraph B below.
- 3. Effective January 1, 2009 and payable in 2010, locomotive Engineers will be eligible for a bonus up to a maximum of ten percent (10%) of their locomotive Engineer earnings in 2009, calculated in accordance with paragraph B below.
- 4. If the BLET does not exercise its right to cancel participation in the Bonus Program under paragraph F below, all locomotive Engineers will be eligible, effective January 1, 2010 and annually thereafter, for a bonus of twelve percent (12%) in 2010 and increasing to fifteen percent (15%) at the end of the next contract of their locomotive Engineer earnings in that year, payable in the following year, calculated in accordance with paragraph B below, except that locomotive Engineers who achieve a BLET seniority date on or after January 1, 2010 will be eligible in 2010 for this bonus up to a maximum of ten percent (10%) of their locomotive Engineer earnings in 2010, calculated in accordance with paragraph B below, with a one percent (1%) increase in that level each subsequent year until they reach a maximum level negotiated for locomotive Engineers. Locomotive Engineers who achieve a BLET seniority date by

NS BLET

AGREEMENT

This agreement is hereby made between the Carriers listed on the signature page below (for convenience referred to hereafter as NSR) and the Brotherhood of Locomotive Engineers and Trainmen (for convenience referred to hereafter as BLET) this 1st day of September 2008.

ARTICLE I - THOROUGHBRED PERFORMANCE BONUS

Section 1

Effective January 1, 2009 and payable in 2010 and each year thereafter, locomotive engineers represented by the undersigned General Committees who work 235 or more starts in through freight service or 220 or more starts in other than through freight service in the year for which the bonus will be calculated will be eligible for a bonus up to ten percent (10%) of their engineer earnings in the preceding calendar year.

Section 2

Effective with the bonus payable in 2010 and each year thereafter, locomotive engineers who work 260 or more starts in through freight service or 248 starts in other than through freight service in the year for which the bonus will be calculated will be eligible for an additional five percent (5%) bonus opportunity.

Section 3

The terms and conditions for the administration of the Thoroughbred Performance Bonus remain as specified in Article I, Sections 3 and 4 of the June 1996 Agreement between the parties, subject to the maximums stated in Sections 1 and 2 above.

Section 4

BLET shall have the unilateral right to accept wage increases as provided in Side Letter No. 1 in lieu of the bonus provided for by Section 1 and 2 of this Article I effective on and after January 1, 2015 by providing written notice to the Carrier of its intention to do so between November 1, 2014 and November 30, 2014.

ARTICLE II – SIGNING BONUS

- (a) Not later than three months after the date of this Agreement each employee covered by this agreement who qualifies under subsection (b) shall be paid a signing bonus of \$1,200.00. Such signing bonus shall be paid in a separate payment and shall be subject to withholdings for applicable Federal, State, and Local Taxes.
- (b) To qualify for the signing bonus an employee must:
 - (1) have an employment relationship with the Carrier as of July 1, 2008 or have retired or died subsequent to the date of this Agreement; and
 - (2) (i) have compensation for active service performed during the period May 1, 2008 through June 30, 2008, or
